01 · WHO WE ARE

One network. Two clear responsibilities.

Shree Radhey Greens represents Wave Sun Energy and builds its partner network. Wave Sun Energy is the product and project-delivery partner; customers pay the company directly for projects.

SRG · LOCAL NETWORK + REPRESENTATION

Shree Radhey Greens

Super Distributor of Wave Sun Energy for Ghaziabad, Gautam Budh Nagar and Bulandshahr. We represent the product range, develop the pan-India Distributor and Energy Advisor network, and help connect enquiries to the right team.

LOCAL SUPPORT

Local stock · joint surveys · DISCOM paperwork · warranty escalation

WAVE SUN ENERGY · PRODUCTS + PROJECT DELIVERY

Wave Sun Energy

Wave Sun Energy manufactures and supplies its own product range, and sources selected third-party brands. Its team handles site survey, technical design, quotation, customer payment collection, supply, installation and commissioning.

CUSTOMER PROJECT PAYMENTS

Paid to Wave Sun Energy — never collected by SRG

A straightforward hand-off

01
Customer enquiry
Share the site, bill and goal.

→

02
SRG / partner
Represent, guide and log the lead.

→

03
Wave Sun Energy
Survey, quote and collect payment.

→

04
Project delivery
Supply, install and commission.

Where SRG's on-ground support is concentrated

GHAZIABAD | GAUTAM BUDH NAGAR | BULANDSHAHR

Both partner routes welcome pan-India enquiries, subject to Wave Sun Energy's application and approval process. A pan-India partner route does not mean SRG installation, stock or local service is available everywhere; scope is confirmed in writing.

AI-generated imagery is representative only; it does not depict actual SRG projects, staff or customers.

02 · SOLUTIONS AT A GLANCE

Six ways to put clean energy to work.

The right fit depends on the site, load, local rules and project economics. Wave Sun Energy surveys and quotes; SRG helps customers and partners find the right starting point.

Residential rooftop solar

1 kW to 20 kW · on-grid or hybrid

Grid-tied rooftop systems for homes and independent floors, sized from your monthly units and sanctioned load. Net-metering and eligible subsidy guidance.

FOR Homes, villas and independent floors

Hybrid solar with battery back-up

Battery optional · grid fallback

Keep grid-tied savings and add storage for outages — lights, fans, Wi-Fi, TV and a refrigerator through power cuts.

FOR Homes with outages, work-from-home setups, clinics

Commercial & industrial solar

25 kW to multi-MW

Turnkey rooftop and ground-mount projects for factories, offices, hotels and institutions — with an ROI model before you commit.

FOR Factories, offices, hotels, hospitals, schools

Society, community & virtual net metering

50 kW to 500 kW

Pool common rooftops for lifts, pumps and lighting — or share generation credits across member connections with virtual net metering.

FOR Housing societies, RWAs, commercial clusters

Solar pumps & solar lighting

Pumps · 10 W to 300 W lighting

Solar irrigation pumps with smart controllers, and street lighting from 10 W to 300 W for streets, societies and highways.

FOR Farms, rural water supply, panchayats, societies

Wind energy & electric mobility

Wind 10 kW–5 MW+ · EV 3.3–360 kW

Wind turbines from 10 kW to 5 MW+, plus EV charging from home AC units to 360 kW hubs and electric scooters for daily use.

FOR Homes, farmhouses, institutions, fleets, fuel stations

Site-specific by design

Capacity, generation, savings, approvals and subsidy depend on a technical survey, sanctioned load, shading, DISCOM rules and current scheme conditions. A written quotation—not a brochure—defines the project scope.

AI-generated imagery is representative only; it does not depict actual SRG projects, staff or customers.

03 · FEATURED PRODUCT FAMILIES

A portfolio built for more than one kind of site.

Nine featured families from the Wave Sun Energy product catalogue. Exact models, specifications, inclusions and warranties are confirmed on the live listing and in the written quotation.

04 · ONLINE STORE

An online catalogue that reaches everyday use.

The Wave Sun Energy store brings together energy hardware and selected home, farm, lighting and infrastructure products. The published snapshot lists 80 items in 12 collections (6 October 2026).

01 Solar kits & systems
On-grid kits and packaged systems

02 Batteries & storage
Lithium packs and backup options

03 EV charging & mobility
Chargers and electric two-wheelers

04 Wind energy
Residential and wider wind systems

05 Water pumps
Solar water and irrigation pumping

06 Outdoor lighting
Street, pathway and perimeter lights

07 Decorative lighting
Decorative and landscape lighting

08 Pooja & décor
Solar diyas and devotional décor

09 Dryers & agri processing
Solar and hybrid drying equipment

10 Furniture & infrastructure
Solar benches, shelters and site assets

11 Safety & surveillance
Solar-enabled security and monitoring

12 Home & living
Utility products for everyday spaces

Check live details before you order

Product variants, specifications, price and availability are controlled by the live Wave Sun Energy store and may change. Orders and project payments are completed with Wave Sun Energy—not collected by SRG. SRG can help customers shortlist products and route enquiries.

05 · HOW PROJECTS MOVE

From first question to commissioning.

A clear hand-off keeps the customer informed and puts technical decisions, project quotations and payment with Wave Sun Energy.

01 Share the need

Customer shares the site, bill, pincode and goal. SRG or the partner records the enquiry and identifies the right team.

02 Survey the site

Wave Sun Energy's technical team checks roof, load, shading, connection and other site-specific requirements.

03 Design & quote

Wave Sun Energy prepares the technical and commercial proposal, scope, components and applicable terms.

04 Accept & pay

The customer reviews the written offer and pays Wave Sun Energy directly. SRG does not collect project payments.

05 Supply & install

Wave Sun Energy coordinates supply, installation and commissioning with the delivery team.

06 Support & escalate

Warranty and maintenance follow written terms. SRG provides local escalation support in its three districts.

The partner hand-off

A Distributor's own direct-sale lead is entered in the Wave Sun Energy partner portal. The company then manages survey, quotation, customer payment, supply, installation and commissioning.

→

SRG

Builds the partner network, represents products and provides local support where applicable.

AI-generated imagery is representative only; it does not depict actual SRG projects, staff or customers.

06 · TOOLS, GUIDES & SUPPORT

Make a better-informed decision.

The SRG website brings product information, local calculators and plain-language guides together before a customer commits.

CALCULATOR

Solar sizing & savings

Uses bill, location and DISCOM context to estimate a starting size, bill impact and payback; related guides explain net metering. Indicative only, not a quotation.

POLICY SUPPORT

Subsidy guide & calculator

Shows central and state support by location and eligible kW. Eligible UP residential support can total up to ₹1,08,000: ₹78,000 central cap plus up to ₹30,000 state top-up. Verify current rules.

FINANCE TOOL

EMI planning

Models an instalment and amortisation schedule. Actual interest, approval, fees and tenure are set by the lender.

LEARN FIRST

Guides, glossary & answers

Practical explainers, FAQs and a site-data assistant help visitors understand products, terminology and next steps.

Local support—and the checks to make before you sign

In Ghaziabad, Gautam Budh Nagar and Bulandshahr, SRG's local stock, joint site surveys and warranty escalation can support the customer journey. Outside these districts, SRG welcomes pan-India product and partner enquiries but does not promise local installation or service.

BEFORE YOU COMMIT

- Sanctioned load + roof
- Current subsidy eligibility
- Warranty + service scope

AI-generated imagery is representative only; it does not depict actual SRG projects, staff or customers.

07 · PARTNER PROGRAMMES

Two routes in. Different earning rules.

Both partner routes are open across India and are application-based. Wave Sun Energy decides approval and current terms; no territory, appointment or income is guaranteed.

NETWORK BUILDER

Distributor

₹1,00,000

Activation credited to a non-withdrawable promotional-kit wallet; used to activate advisors.

ELIGIBLE PRODUCT-SALE COMMISSION

15% on your own eligible sales + 5% on eligible sales by advisors under you.

- Build the advisor network; support advisors and log your own direct-sale leads in the partner portal.
- Each advisor pays ₹10,000 to the distributor (retained) plus a separate ₹2,000 referral to the promotional-kit wallet.
- PAN and bank account required; GST registration for trade invoicing as applicable.

OWN-SALE ROUTE

Energy Advisor

₹10,000

Activation includes a promotional kit; follow current official instructions for registration and payment.

ELIGIBLE PRODUCT-SALE COMMISSION

10% on your own eligible sales only. No indirect tier.

- Introduce customers, record the lead and follow up; no installation crew or inventory is required for the advisor role.
- If activated under a distributor, the ₹10,000 is retained by that distributor; a separate ₹2,000 referral credits the kit wallet.
- PAN and bank account required. Training and proposal guidance are part of onboarding.

One rule for both routes

All commission rates are exclusive of GST and apply only to eligible sales under the current written agreement. Customer project payments go to Wave Sun Energy. Only eligible product-sale earnings in the income wallet are redeemable; promotional-kit wallet credits are not cash.

AI-generated imagery is representative only; it does not depict actual SRG projects, staff or customers.

08 · WALLET MECHANICS

Keep wallet credit separate from cash.

This one-time arithmetic example explains how distributor kit-wallet credits can recycle. It is not a monthly-income projection or a promise.

START

₹1,00,000 kit wallet

Non-withdrawable activation credit. At ₹10,000 per activation it can fund 10 advisors.

AFTER 10 ADVISORS

₹20,000 wallet balance

Ten ₹2,000 referrals return ₹20,000 to the kit wallet. Separately, the distributor retains ₹1,00,000.

NEXT 2 ADVISORS

₹20,000 used

The referral balance funds two more ₹10,000 activations. Their two ₹2,000 referrals return ₹4,000.

AFTER 12 ADVISORS

₹4,000 kit balance

The remaining wallet credit is non-cash. Another ₹10,000 activation needs ₹6,000 more, subject to written terms.

A separate cash calculation

12 advisor payments × ₹10,000 retained by the distributor = ₹1,20,000. Compared with the initial ₹1,00,000 activation outlay, the gross cash difference is ₹20,000 before expenses and taxes.

NOT NET PROFIT

This simple difference excludes travel, marketing, staffing and other costs; it is not a guarantee. Do not count the ₹4,000 kit-wallet credit as cash. Only the income wallet is redeemable.

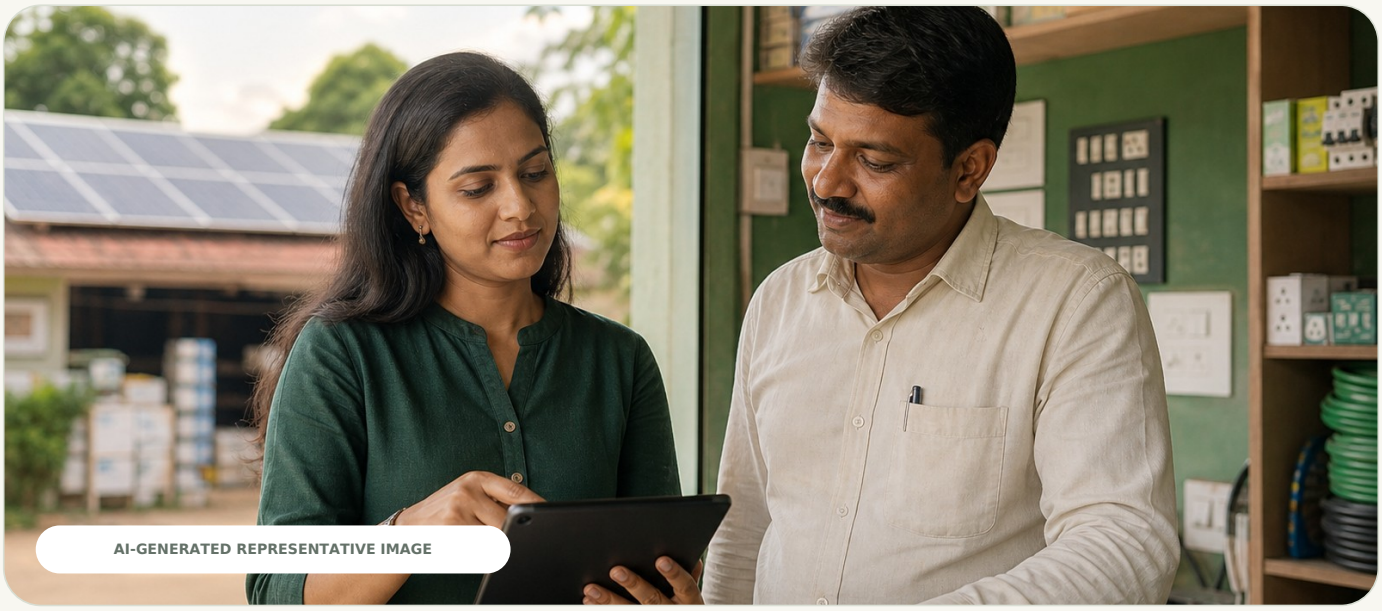

Two wallets, two jobs

Promotional-kit wallet: non-withdrawable credits used for advisor activations. Income wallet: eligible product-sale commissions; this is the only redeemable balance. Always follow the current Wave Sun Energy partner agreement and payment instructions.

AI-generated imagery is representative only; it does not depict actual SRG projects, staff or customers.

Let's find the right next step.

Tell us whether you are exploring a project, a product or a partner route. We will point you to the right team and the right written information.
